VARIOUS INTERIOR STYLES**

OPTIMAL TILE FORMAT FOR EVERY
BATHROOM, SUITABLE FOR MOST
CONCEALED CISTERNS AND
SHOWER CABINS

SEASONS OF BEAUTY

in your interiors

3 NEW WALL COLLECTIONS

True beauty never fades, it is timeless. So it is with our new series of wall tile collections in the 40×120 format. The timeless beauty of all collections will make every room with 40×120 tiles balanced and elegant. Simply combine base and decorative tiles in the room – and the interiors will create a well-designed space where one can feel comfortable.

TOSSA

The Tossa collection is an unconventional interpretation of travertine, which on one hand is exceptionally uniform and raw, and on the other intriguing and full of surprises. The graphics faithfully replicate the natural rock, including its interesting, porous and speckled pattern, as well as warm, beige color, and the matte finish of the products further emphasizes the stone nature of the tiles. Among the available options are unique, structural wall tiles, in the form of narrow, convex strips, as well as smooth wall-floor tiles, which enhance the interior's mono look.

The collection will work well both as a central design point in the bathroom or living room, but also will be an excellent base for interior experiments, especially since the tiles blend perfectly with wood, stone, and glass, as well as with colorful elements.

SOLIVI

Solivi is a collection of matte tiles inspired by the intriguing combination of wood and concrete. The tile graphic imitating wood features a delicate pattern of layers with few knots. The tile is smooth and kept in a warm, beige color, which will bring peace and balance to the room. Tiles inspired by concrete show the unusual, subtle face of cement, where the perfect complement to the smooth tile is a structured tile, in which parallel, thin strips add dynamics and unique character to the composition.

Despite its simplicity and delicacy, this collection allows for the creation of interesting arrangements that exude tranquility, elegance, and naturalness. As an addition to the composition, faded gold will find application, as well as wicker and wooden elements, and decorations in more vivid shades of natural clay.

ALMERA COLOR

Stylish and harmonious, yet interesting and varied interior is a solution that we gladly welcome into our homes. We can easily create it thanks to the intriguing versions of the Almera Color collection in white and graphite shades.

TWO VERSATILE TILE COLORS: WHITE AND GRAPHITE

DECORATIVE TILES WITH LAMELLAR STRUCTURE

HARMONIOUSLY COMPLEMENT STONE, CONCRETE, OR WOOD

ALMERA COLOR white

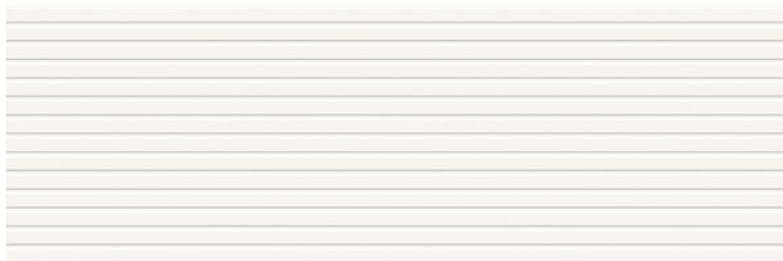

Almera White is a white, wall tile with a structure of thin strips, which will enrich any space and give character and dynamics to the interior. The delicate, pleasant to the touch, satin finish emphasizes the subtle elegance of the tiles and adds charm to them. Matte wall tile in a universal beige shade from the Calm Colors collection is the perfect set that will work well in combination with the structured lamellar tile Almera Color White.

This combination will work in various interiors and design styles, and the charm of the composition will be further emphasized by adding elements of wood, cement, or stone.

ALMERA COLOR graphite

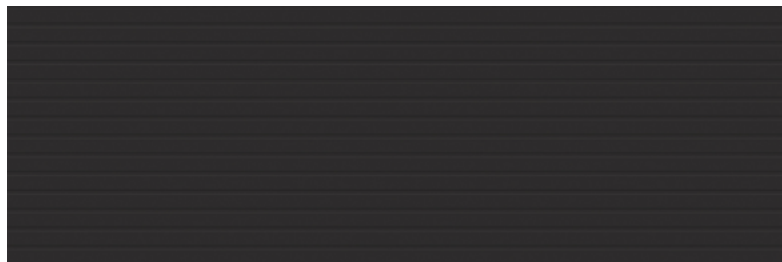

Almera Graphite is a graphite, monochromatic tile with a lamellar structure and a satin finish. Positioned vertically on the wall, it brings raw elegance to the room, appreciated not only by men.

This combination allows for the creation of a characterful interior that is both stylish and refined. The arrangements can be successfully complemented with glass and universal accessories, as well as wooden and stone elements.
